PROFESSIONAL SKILLS

- **Languages:** C++, Java, Python, HTML/CSS, JavaScript. React.js, Node.js.
- **Developer Tools:** Git/GitHub, Amazon Web Services (AWS), MATLAB, Visual Studio, Postman, VS Code.
- **Databases:** MySQL, MongoDB.
- **Non-Tech Skill:** Product Development and Management.

EDUCATION

VIT Bhopal University, CGPA: 8.40

Bhopal, India

*Bachelor of Technology in Computer Science and Engineering
(Specialization in Cloud Computing and Automation)*

August 2023 - May 2027

Agrasain Boys' School, Percentage: 88.0%

West Bengal, India

April 2021 - April 2023

EXPERIENCE

COLLABIFY.AI(Remote)

Dec'24-Dec'25

- Worked as a Full-Stack Developer and AI Engineer building a platform to connect cottage-level industries to social media creators to promote their products and brands.

WEATHERFORD INTERNATIONAL(On-Site)

June'26-Aug'26

- Worked as a Research and Development Engineer (AI/ML) Intern on a 2-way ML model specifying design requirements of products and predicting the forces exerted by them. Achieved an accuracy of 98.78% over a million-row dataset.

ACHIEVEMENTS

- Solved 305 Leetcode Questions with an accuracy of 82% with rank 431,816.
- Completed Hacktoberfest'24 and Hacktoberfest'25 and GSSoC'25 with 100% completion.
- 480 days Japanese learning streak on Duolingo(ongoing).
- Participated in various college and national level hackathons on Unstop.
- Completed a Certificate Course on COURSERA of **The Bits and Bytes of Computer Networking**.
- Completed NPTEL-Swayam Courses Internet of Things (IoT)'25 and Cloud Computing'26.
- Completed MERN Full Stack Certification Program by ETHNUS Internship trainer with a score of 92/100.

PROJECTS

OralCancer MedTech

- **Developed an AI-powered oral cancer detection system** achieving **97.8% accuracy**, analysing user-uploaded images for early risk assessment and diagnostic insights using deep learning models. Built a mobile application using Django and React Native.

Med Prior

- **Developed an AI-powered medical chatbot** using NLP and ML to analyse user symptoms and provide personalized health advice and solve triage inefficiencies and response prioritization. Also integrated real-time appointment for smart scheduling based on risk score allocated. Developed all this using MERN Stack and Python.
